## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 1 is objected to because of the following informalities: in line 13, either of the indefinite articles -- a -- or -- the -- should be inserted before "longitudinal. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-6,8, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Jud (US 5,100,003). See the embodiment of figures 1-4 wherein the first end side seams are located on portion **21** and longitudinally oriented tear line **4** provides the opening means. See figure 8 regarding the peel seal of claim 3. Gripping members **17,19** and **17',19'** have an extend less than that of the package as seen in the figures.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Jud.

Jud teaches the claimed package except is silent regarding the specific length of the tear lines only that the limit the zone of tearing.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to select the length of the weakening lines to extend at least two-thirds the length of the front wall. Doing so allows for sufficient opening of the front panel for easy removal of the contents therein.

***Allowable Subject Matter***

6. Claim 9 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including **all** of the limitations of the base claim and any intervening claims.

***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Various prior art closures teaching features similar to those disclosed and/or claimed are cited for their disclosures.
